

Children's Story
30 points

Tell a children's story using role shifting. It needs to have a minimum of 2 characters. I am looking for story flow (not stuck in the book, but know the story to tell it). I want you to use correct ASL grammar, non-manual markers and correct production of the signs. It should be fun to watch and understandable. Be creative and expressive. Story telling is part sign and part mime, especially when you use role shifting. Become the characters and have fun with it.
